

STERILE ENVIRONMENT

DISPOMOP®

SINGLE-USE MICROFIBRE MOP

INDICATIONS

Single-use Microfibre mop, for the cleaning of floors and vertical surfaces.

Cut using ultra-sound and heat-setting technology limiting the low particulate material. Compatible with all types of coating.

ENVIRONMENT

Ultra-economic washing solution (water and product).

French manufacturing.

ENVIRONMENT

The stains are collected between the sons and do not settle.

Bevelled edges to clean uneven spots.

Fine wire makes dirt removal easy.

DISPOMOP®

TECHNICAL CHARACTERISTICS

- Composition : 100% polyester (70% microfibre 0,56 dtex, 30% textured yarn).
Improves gliding action on floor.
- Size : 11.5 x 49.5 cm for 40 cm velcro base.
- Weight : 180 g/m²
Dry weight : 11 g
- Construction : heat-set flat weave.

STANDARDS

Low particulate material compatible with use in ISO(7) zone.

Bacteriological reduction tests validated according to standard EN13697.

PROTOCOL

1. Enter the room and place some solution on the floor.
2. Put the wet mop on the floor and place the base on it.
3. Start with the skirting.
4. Then clean the surface using an S-motion by re-wetting in solution or using a tank-broom.
5. When finished, place feet on both ends of the mop on the base, then remove the Velcro-adhered mop.
6. Place frame at a 90° angle on the mop on the floor.
7. Then retrieve the mop folded in 2 by lifting up the base, then remove without touching the dirtied part.

EQUIPMENT

Telescopic aluminium handle.
Aluminium handle with tank.
40 cm micro-velcro base with PAD (provided).

The PAD assures an optimal contact between the velcro base and the Dispomop® to increase retrieval surface.

PACKAGING

10 bags of 50 pieces + 1 PAD : 100.419
