T320

PREMIUM MICROFIBER CLOTH FOR ANY TYPE OF SURFACE

If you're addicted to chemicals, *T320* will cure you. No need to detox, just try it. A lot of microfiber cloths have heeded the call of low prices, forgetting their reason for existence in relation to basic cloths. *T320* has not changed and is well worth it in the long run with a 500-wash resistance.

T320 uses «Super Paul» knitting technology producing a unique, light, inimitable small loop design. Its top quality cleaning on any type of surface is a direct result of significant contact at all points and easy glide.

It's a must-have in terms of microfiber loop. Enthusiasts wouldn't change it for the world and we wouldn't either.

The size of its microfibers (0.2 decitex) is more than 100 times finer than hair. This gives it unbelievable dirt removal capacity (mechanical force) and absorption capacity (capillary force).

Two words characterise *T320*: versatility and performance.

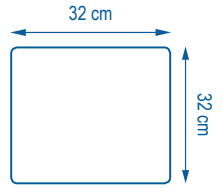

If folding in four is an insurmountable obstacle for you, don't use it in a ball, choose its little sister, *Mini 320*, which solves the problem by naturally folding in two for use flat on the surface. So you can enjoy all the features of *T320* at a *Mini* price.
