## MICROFIBER KITCHEN TOWEL FOR DRYING DISHES

*Chronodry* takes its name from its rapid drying capacity. It's a microfiber cloth with instant drying power, leaving no mark or fluff and drying rapidly after use so it's always ready to go.

Its honeycomb structure allows it to glide over surfaces, from glass to glass with infinite ease. *Chronodry* is made up of bumps and hollows offering a remarkable touch and solid manual protection.

*Chronodry's* large size (45 x 60 cm) prevents the user from leaving fingerprints everywhere. You can pick up a glass by the stem and reach right to the bottom to dry every last drop.

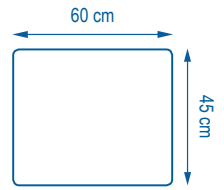

It leaves no fluff, can be washed 300 times, remains stable when washed and is 100 % microfiber (70 % polyester / 30 % polyamide). What more could you want?

Oh yes, it's grey so it remains clean and presentable at all times.
