DISPOSABLE MICROFIBER CLOTHS ON A ROLL

As all the other products in the Mini range, the *Miniroll* microfiber cloths are naturally used flat on the surface, as their size is ideally adapted to your hand. By pulling two sheets from the roll, instead of one, it naturally folds along the pre-cut line offering two useful sides and full protection of the hand.

Even though it is only slightly thicker than a sheet of paper, this mini microfiber cloth is ultra-strong and non-linting! Single use by nature, it will withstand 5 washes if required. A high-absorption product, it will not leave any mark.

Miniroll is patented and manufactured in France and made from 100 % microfibers and contains no chemical binder. To clean mirrors, stainless steel or any other common surface. As you may have understood, this is a must-have for professionals who want to combine impeccable results and control over cross contamination.

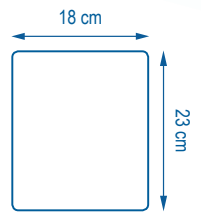

Miniroll is approved for food contact and validated for explosive atmospheres in the presence of flammable dust (Group III ATEX sites). Ideal in the agro-food and other demanding industries, it will be as effective on a daily basis in more standard environments.

PROTOCOL

Advanced industries

Operating theaters /
Intensive care units

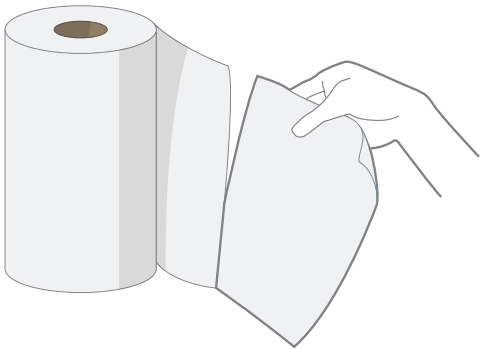

Healthcare

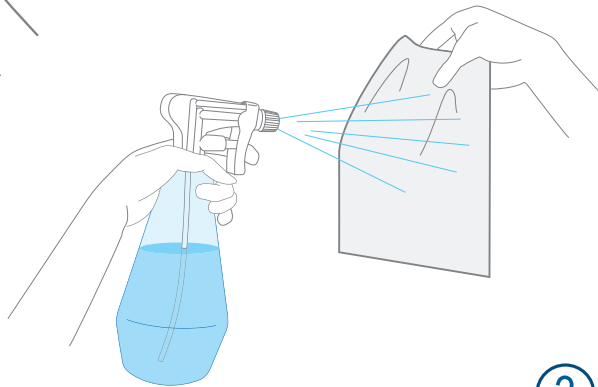

Retirement homes

- 1 Remove the precut washcloth

- 2 Dampen the microfiber washcloth

- 3 Use flat on the surface, using a different microfiber every time you move to a new surface

Always start with the cleanest areas and finish with the most soiled areas.
