Aluminium Frame

UNIVERSAL ALUMINIUM FRAME WITH ERGONOMIC BALL JOINT

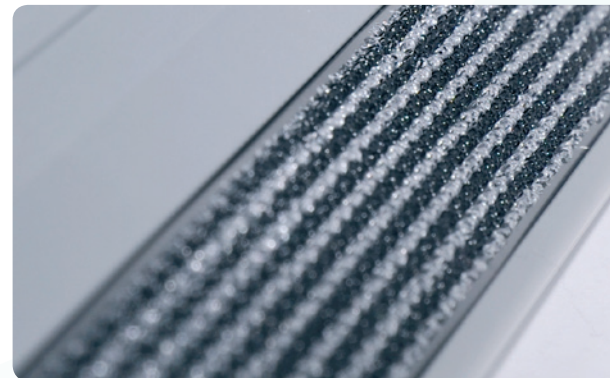

Aluminium Frame has been marketed from the get-go (July 2000) with all the timeless standard features. It was decades ahead of its time! And is just as successful now, even with the arrival of imported copies from Asia and cheap plastic products.

There are three fundamentals to its success:

- **Durability:** *Aluminium Frame* has been tested daily by professionals for more than 15 years.
- **Légèreté:** aluminium; not only is *Aluminium Frame* light but also one of the slimmest on the market; it's very flat and therefore easy to maintain.
- **Modularité:** the frame unit is made up of separate pieces, easily replaceable and stocked by DECITEX (Velcro strips, Velcro top, nozzles, ball joints).

The ball joint of the *Aluminium Frame* is patented and allows easy insertion in all handles from the range. No more nipped fingers on insertion or removal. This ball joint rotates 360° for completely ergonomic use and locks easily for vertical cleaning or to prevent the handle falling if leant against a wall.

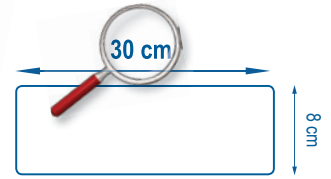

The end of your frame can be customised in blue, yellow, green, red or black according to your taste. These colours also enable allocation by work area and limit cross-contamination. It comes in a wide variety of sizes from 30 cm to 1.20 m!

TECHNICAL SPECIFICATIONS

100 489

Plastic and
Aluminium

Description: Universal aluminium frame with ergonomic ball joint

Packaging: Box of 10 Aluminium Frames

Counterpart: Special connection for an easy insertion and a blocking rotation - changeable Velcro tabs

Spare parts: Connection (réf.: 100 895)

Protecting ends blue (réf.: 100 905)
yellow (réf.: 100 906)
green (réf.: 100 907)
red (réf.: 100 908)
black (réf.: 100 909)

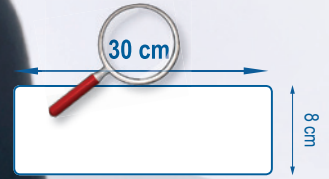

Upper Velcro x 4 (réf.: 100 899)

Velcro spare parts x 2 30 cm (réf.: 100 912)
