## FLEXIBLE HANDLE TO CLEAN HARD TO REACH PLACES

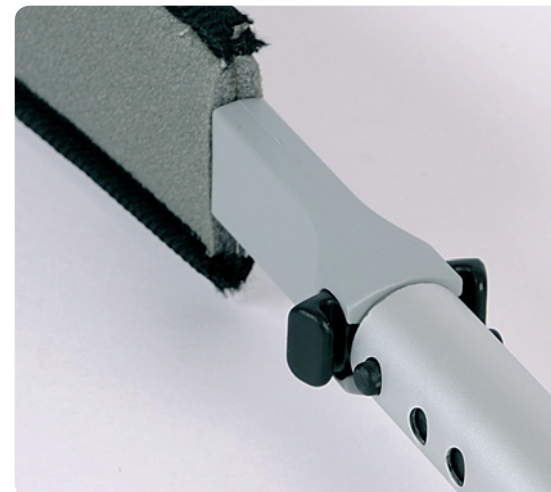

Straight as a die or all twisted, *Ergoflex* is a contortionist! It tackles the most unlikely hard-to-reach places where you would never dream of putting your hands. It's really useful when covered with a sleeve, either disposable, *Dispocover*, or washable 300 times, *Ergodust*.

Once united, *Ergoflex* and its sleeve need nothing else. Not even need water as they do the job dry by electrostatic force, attracting the dust from all its hiding places.

By connecting a telescopic handle from the DECITEX range in place of the handle (*Mini* 77 cm or standard 1.60 m), you can dust in complete safety, even high up, with both feet on the floor.

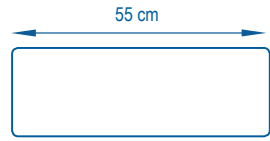

*Ergoflex* is an essential ergonomic tool for dusting behind radiators, on top of furniture, televisions and even doors. It can also reach the most crucial places equipped with its disposable sleeve, *Dispocover*, for example to clean on top of lamps in operating theatres. Another addictive innovation from the first use!
