## MINI UNIVERSAL TELESCOPIC HANDLE

Following several requests from customers, we thought it was time to make window cleaning easier. The thought process was relatively simple: take some microfiber experts (us!), add 15 years' experience in ergonomic handles and frames and you get an optimum cleaning solution for smooth surfaces.

The *Mini Telescopic Handle* measures 77 cm and adjusts to the user's height to prevent musculoskeletal disorders (MSD). It's ultra-light, has an ergonomic anti-slip globe and an anti-run ring that allows you to wedge your hand to make your work even easier.

Combined with the *Mop V200*, it makes cleaning high surfaces (windows, mirrors, etc.) and flat low surfaces such as table tops (refectories, cafés, restaurants, etc.) a pleasure at last. But that's not all: when connected to *Ergoflex* (flexible handle) equipped with its microfiber sleeve, *Ergodust* or *Dispocover*, you can dust high up, with both feet on the floor, no more vertigo.

No more pain, backache or arm ache, the *Mini Telescopic Handle* is a significant advance, making everyday work easier.

Industry

1

Adjust the length of the handle to suit your height and what you want to reach

2

Add either a frame or a flexible handle on the end of the telescopic handle

3

Dust top corners of a room

Ergodust - microfiber sleeve for dusting hard-to-reach places

Use the Ergoflex with the Mini Telescopic Handle to prevent musculoskeletal disorders (MSD)

4

Clean high and low surfaces as needed

Mop V200 - microfiber mop for smooth surfaces (stainless steel, windows, mirrors)
