

Klerpack®

Sterile Pens

Advantages

- 10 double bagged pens conveniently packed into a third bag
- Permanent blue or black ink to meet QA requirements for photocopied documents
- Labeling on the pen is alcohol resistant, so it does not rub off on gloves
- Perfectly suited to writing on plastic bottles or containers, plastic petri-dishes, labels and paper
- Fine writing - only 0.5 to 1mm line thickness.
- With Klertear feature, so packs are easy to open even when wearing gloves.

Description

Klerpack Sterile Pens are available with black or blue ink for note taking in cleanrooms and critical areas.

The pens are packed in a cleanroom environment, individually double bagged with ten pens bagged into a third bag and gamma irradiated at not less than 25kGy. The packs have the Klertear feature, making them easy to open, even with gloved hands.

Validation

EN ISO 9001:2008, EN ISO 13485:2012 and European Medical Device Directive 93/42/EEC accredited company.

Certificates available for each irradiated batch.

Product Codes

CODE	OLD CODE	DESCRIPTION	SIZE	UNIT OF SALE
