

Klercide™

70/30 Sterile Alcohol

Sterile spore free 70/30 v/v alcohol, either IPA, Denatured Ethanol or Pharma Ethanol, blended with highest grade (EP) Water for Injection.

Advantages

■ High quality product

All three types of alcohol are blended with highest grade (EP) Water for Injection, with guaranteed endotoxin levels below 0.25 EU/ml. They are triple bagged for easy transfer into Grade A and B cleanrooms and gamma irradiated to ensure a sterile, spore free product.

■ Range of formats

There is a choice of easy to use trigger sprays from 500 ml to 4.0 litre, aerosols and capped ready-to-use alcohol. The large droplet size of the trigger sprays reduces the risk of inhalation.

■ Guaranteed sterility during use

The SteriShield Delivery System on the trigger spray formats has been validated to give an in-use shelf life of three months, so there is no need to discard unused product. The aerosol has also been validated to maintain sterility for three months during use.

■ Optimum surface coverage

The choice of formats allows the user to select the most appropriate method of application, from the fine mist of an aerosol, to a fully adjustable trigger spray which allows the liquid to be dispensed as either a jet or spray, or application via a wipe to minimise inhalation.

Description

Klercide 70/30 IPA is a blend of 70% isopropyl alcohol with Water for Injection. Klercide 70/30 Denatured Ethanol is 70% denatured ethanol blended with Water for Injection. Klercide 70/30 Pharma Ethanol is 70% ethanol denatured with IPA for a very low residue product. Endotoxin levels for all formats are guaranteed to be below 0.25 EU/ml.

The alcohol blend is 0.2 micron filtered, filled and triple bagged under Grade A (ISO class 5) laminar flow in a Grade C (ISO Class 7) cleanroom, before irradiation using a validated process at no less than 25 kGy.

All trigger spray bottles incorporate the patented SteriShield Delivery System and an adjustable trigger spray. The unique way in which the SteriShield Delivery System works as a closed system, ensures that the sterility of the contents is preserved throughout use.

Protocol

Ready to use, so can be sprayed directly onto the surface to be sanitised. Always ensure the whole surface is in contact with the liquid. For optimum results, wipe the surface to physically remove any contaminants.

Validation

Supplied by a ISO 9001:2008, ISO 13485:2012 and European Medical Device Directive 93/42/EEC accredited company.

Passes EN test 1276 for bactericidal efficacy and EN 1650 for fungicidal efficacy.

Certificates of analysis, irradiation and quantitative endotoxin levels <0.25 EU/ml with every batch.

Endotoxin tested to an approved pharmacopœial method.

2 year shelf life for trigger sprays and capped, 3 year shelf life for aerosols.

Full supporting documentation is available on these products.
