

TEMPSHIELD

INCORPORATED

Product Specification: Waterproof Cryo-Gloves®

Description: Waterproof Cryo-Gloves® are multi-layer insulated cryogenic gloves. They are available in four styles and four sizes in each style. The outer shell is royal blue in color.

- The Wrist (WR) style glove incorporates a nylon Cordura® knit wrist cuff.
- The Mid-Arm (MA) style glove has an insulated gauntlet type cuff that extends to mid forearm.
- The Elbow (EB) style glove has an insulated gauntlet type cuff that extends to the elbow.
- The Shoulder (SH) style glove has an insulated gauntlet type cuff that extends to the shoulder.

Statement of Use: Waterproof Cryo-Gloves® are designed to provide a high level of protection to the hands and arms from extremely cold temperatures, both in cold atmospheres and from transmission of cold through direct contact with cold objects. The gloves are intended for use in a variety of applications and under a wide range of conditions.

Limits of Use: The maximum duration of exposure at ultra cold temperatures is dependent on many variables, including atmospheric conditions, the task being performed and the users physiology. The thermal flux transmitted through the glove is sufficiently low to allow the user adequate time to safely remove themselves from the hazard.

Warning: Waterproof Cryo-Gloves® are not designed for immersion in liquid nitrogen (LN₂) or other liquid cryogenics.

Materials: The outer shell is a 2-layer bi-component material consisting of nylon Taslan® with a liquid proof, breathable membrane on the inner surface. The outer surface of the material is treated with a durable water repellent finish. The glove liner is constructed from a thin, flexible, seamless, breathable, waterproof membrane. The inner hand component of the glove consists of 3 layers: 2 layers of non-woven synthetic insulation material and a lining material that is insulative and wicks moisture away from the skin. The inner cuffs of all styles except the Wrist style contain a single layer of insulation material, a scrim backing and a nylon taffeta lining.

Construction: Waterproof Cryo-Gloves® are of sewn construction, comprised of an outer shell, a seamless, breathable waterproof glove liner, and an inner insulated glove, which are joined together at the cuff opening.

Care instructions: Store in a clean dry space.

Cleaning Procedure:

Machine wash warm, using a normal cycle with a mild detergent;
Do not exceed a wash temperature of 50°C or 125°F

Do not use chlorine bleach

Do not dry clean

Hang gloves to dry; do not machine dry

Packaging: Waterproof Cryo-Gloves® are packaged in pairs in poly bags. Available by the pair or case (10 pair of 1 size / style).

For shipping: Individually packaged pairs of gloves shall be additionally packaged in a suitable packing carton constructed to meet all applicable freight requirements.

Labeling: A woven label is sewn on the outer shell displaying the product name "Waterproof Cryo-Gloves®" and the manufacturer name "Tempshield, Inc". A Care / CE / Size / Model label is sewn into the hem on the inside of the cuff.

Origin: Made in the USA

Waterproof Cryo-Gloves® are ergonomically designed, absent of risks and nuisance factors, contain no materials known to cause allergies or health hazards, and are comfortable to wear for extended periods.
