

## RUBBER BULBS SAMPLING

### NATURAL RUBBER

- Easy to use
- Repeated samplings

Colored range of 5 bulbs from 1 to 15 ml. Longer service than teats. Not to be confused with ordinary, thin-walled teats. Bulbs have a thickened wall between which pipettes are placed. They grip the glass firmly and protect it. The inner chamber widens out to give an accurate content. A remarkable repeatability of intake can be obtained. Sampling can be achieved in a minimum amount of time.

Catalog No.*	Item	Pack Size
101010-10	1ml - Green	10
101011-10	2ml - Grey	10
101012-10	5ml - Yellow	10
101013-10	10ml - Blue	10
101014-10	15ml - Red	10

## TEATS SAMPLING

### LATEX AND SILICONE

- Standard lab item
- Easy to use
- Available in Latex and Silicone

Our Versilic Silicone is ideal for applications requiring chemical and temperature resistance.

Catalog No.*	Item	Pack Size
161050	Olive-Versilic	100
101981	Olive-Latex	1000
101982	Straight 45 long Latex-7 mm dia.	1000
101983	Cerise-Latex	1000

## PRESSURE BULB SAMPLING

### NATURAL RUBBER

- Standard lab item
- Easy to use

Simple pressure bulb with release nozzle for automatic burettes.

Catalog No.*	Item	Pack Size
101172-01	Pressure bulb with tube	1
101176-01	Special bulb for automatic burette with tube	1

### SUCTION AND PRESSURE BULB SAMPLING

Catalog No.	Capacity ml	Pack Size
101180-01	60	1

## BLOWER SAMPLING

### NATURAL RUBBER

- Standard lab item
- Easy to use

Bulb in netting allows for regulation of outflow.

Catalog No.*	Item	Pack Size
101182-01	Double bulb for thermocautery	1
