Art. 15600

ANTICID, EN 467, CE

Brown working apron out of polyester textile with a nitrile latex coating on both sides, very tear- and abrasion-resistant, very good resistiveness against oils, fats, acids, alkaline solutions, alcohols, hydrocarbons, hot water etc., material thickness 0,5 mm, shoulder and waist ribbons adjustable in length with click closures. Packing: 1/5 pieces.

Sizes: 90 x 110 and 95 x 120 cm

Usage: Solid apron for works with aggressive, chemical influence, ideal for food producing companies like butcheries, slaughterhouses, dairies, canneries, chemical plants etc. The two shoulder ribbons adjustable in length permit a perfect fitting of the apron to the wearer. Whereas other aprons have neck ribbons, the weight of this apron is allocated to both shoulders. Thus the wearing comfort is excellent, which can particularly be felt during longer wear. Protected model (registration number DM/064459).

Country of origin: Switzerland

Customs tariff number: 4203.1000
